

Balcrank "LEVER-PUSH"

FOR practical, economical, efficient one man lubrication service the Balcrank "Lever-Push" Specialized Lubricator is superior to all others. That is the reason you'll see them everywhere. Pushed against Zerk fittings in a straight line it cannot slip or wobble....grease piston forces lubricant in a straight line and in the same direction the gun is pushed against fittings. Available in all pressures...measured or constant flow...air primed or spring operated.

Specialized Lubricator

The Balcrank "Super-Service" Wrench

A COMPLETE wrench that eliminates the old fashioned socket and fits all sizes of square or hex nuts... has plugs for all size insert nuts and a special hammer attachment. Grips like a vise... unconditionally guaranteed... the Balcrank Super-Service Wrench should be in every mechanic's kit... on every work bench. Made of the finest steel, machined to perfection. Don't be without one.

The Brookins "STAND-ALONE" MEASURE

with Self-Tightening Swivel Joint

HERE'S a rigid spout, non-skidding measure made to parallel the high standards of all Brookins products. A "Stand-Alone" measure that cannot wiggle or wobble. Spout operates on a self-adjusting swivel that keeps the joint tight at all times guarding against oil leakage and assuring smooth, easy action of the spout. Available in one to five quart sizes in polished copper or bronze lacquer... and most important of all... they DO stand up under hard usage.

THE CINCINNATI BALL CRANK CO., CINCINNATI, OHIO.
